

SWEDISH STEEL

**A pedal that delivers that classic Chainsaw Death Metal tone  
But with a possibility to add more tight and modern options  
Thanks to the Boost and Pre Low-end Gain control located  
before the distortion section.**

Power requirements are 9VDC (100mA minimum).

**.Level:** is the output volume

**.Bass:** controls the amount of low end

**.Middle:** Cuts or boost 500hz frequencies region

**.Treble:** Controls the amount of the Chainsaw Tone between 1and 1.3Khz

**.Gain:** controls the Amount of Distortion

**.Tight/Boost toggle switch:** Turns the boost section On or Off

**.Tight:** Controls the amount of low-end pre-distortion

**.Boost:** Controls the amount of pre-gain on the Pedal
